

Cosmo

Armchair \

An armchair with a universal contemporary design. Looks like a chair, but has the sitting comfort of a sofa. Adjusted seating comfort for the elderly with a contemporary look: the chair's dimensions are fully tailored to the needs of older people, enabling them to sit down and to get up more easily. The matching footstool Cosmo completes the look.

What makes the armchair Cosmo so unique? \

- \ \ Perfectly thought-out ergonomic sitting comfort
- \ \ Opening between the back and seat
- \ \ Armrest with grip
- \ \ Sturdy steel frame with wooden legs or complete steel tube frame
- \ \ Easy on-site assembly and disassembly

TECHNICAL FEATURES

COSMO ARMCHAIR

Frame Metal frame. The frame makes a strong contribution to the stability and sturdiness of the armchair. It also creates the visual impression that the seat shell is only supported by the four legs.

Seat, back and side panels Single-piece upholstered seat shell. Choice of high or low back and narrow or wide armrests. The wide armrests provide additional comfort and support for prolonged sitting and standing up. With crumb gap between seat and back for easy cleaning.

Legs The leg placement ensures maximum stability when users lean on the chair and prevents tipping when sitting down or standing up. Choice of four wooden legs with round or rectangular cross-section or four metal legs.

COSMO FOOTSTOOL

Frame Metal frame. The frame makes a strong contribution to the stability and sturdiness of the footstool. It also creates the visual impression that the cushion is only supported by the four legs.

Cushion Upholstered cushion.

Legs Choice of four wooden legs with round or rectangular cross-section or four metal legs.

OPTIONS & ACCESSORIES

\\ Separate neck cushion

\\ Felt glide

\\ Teflon glide

ASSEMBLY AND DISASSEMBLY

Final assembly of the Cosmo armchair takes place on site at the time of delivery. This allows us to reduce the shipping volume significantly. The armchair consists of just two components: the frame with the attached legs and the seat shell. The metal frame is attached to the seat shell by four screws. This type of assembly allows the frame to be detached later on, so the frame or seat shell can easily be replaced on site.
